

CEN354 OPERATING SYSTEMS - ASSIGNMENT #1 REPORT

Linux is the best known and most used open source operating system.

While I was setting up this operating system, I had a hard time. I learned how to set using the Internet and Youtube resources for my homework. Later, I installed Github to this operating system that I have installed, always help from the internet. And then written the code required for the assignment.

A few images of the terminal I created are attached .

A screenshot of a Linux terminal window. The window title bar shows 'Etkinlikler', 'Uçbirim', and the date '24 Mar 21:45'. The terminal prompt is 'sinem@machine: ~/hello'. The user enters 'cd hello', which results in an error 'bash: cd: hello: Bir dizin değil'. Then the user enters 'touch hello.c', 'ls', which shows 'a.out hello hello.c', 'gcc -o hello hello.c', and './hello', which outputs 'HELLO WORLD!!'. The terminal window has a dark purple background and a sidebar on the left with various application icons.

```
sinem@machine:~/hello$ cd hello
bash: cd: hello: Bir dizin değil
sinem@machine:~/hello$ touch hello.c
sinem@machine:~/hello$ ls
a.out  hello  hello.c
sinem@machine:~/hello$ gcc -o hello  hello.c
sinem@machine:~/hello$ ./hello
HELLO WORLD!!
sinem@machine:~/hello$
```
